

Yancie Troy Saludo

Product Design Engineer

yanciesaludo14@gmail.com | Rizal, PH | [linkedin.com/in/troy-saludo](https://www.linkedin.com/in/troy-saludo) | yancietroy.github.io

PROFESSIONAL SUMMARY

Product Design Engineer with 3+ years of experience shipping B2B SaaS and consumer mobile products. Designs in Figma and builds AI-powered production apps in React Native, Expo, TypeScript, Swift, and Firebase through AI-assisted development. Built two live apps solo, including one with 30,000+ users.

WORK EXPERIENCE

Product Designer | Velaro, USA (Remote)

Nov 2023 – May 2026

- Owned design-to-ship for core platform surfaces (admin, inbox, chat widget), from Figma spec through implementation review and release with engineering.
- Built and maintained a Tailwind CSS design system adopted across the platform, keeping Figma components and production code aligned.
- Designed IVR, sentiment analysis, workflow automation, and AI chatbot builder features end to end, writing implementation specs for engineering.
- Served as primary QA for 20+ third-party integrations (e-commerce, CRM, scheduling), root-causing defects to specific code and configuration.

Product Designer | GrowthBox, Australia (Remote)

Jun 2023 – Nov 2023

- Designed core workflows for a SaaS analytics platform serving clinic managers, grounded in user research on data access pain points.
- Produced component specs and interaction flows in Figma that served as the source of truth for engineering handoff.

PROJECTS

GroceryBudget | React Native, Expo, TypeScript, Firebase

Apr 2025 – Present

- Designed and built an offline-first grocery budgeting app for iOS and Android, from Figma design system to production code, through AI-assisted development.
- Reached 30,000+ users and grew monthly revenue 20x in six months with zero paid acquisition.
- Shipped AI price-tag and receipt scanning (Gemini API on Firebase Cloud Functions) that extracts items, prices, and categories from a photo.
- Ran paywall and pricing A/B tests in RevenueCat and PostHog; cohort analysis that refocused acquisition on the US raised conversion to paid 9x.
- Built the marketing site, grocerybudget.app, in Next.js, React, and Tailwind (shadcn/ui on Radix).

Fifi | Expo, Swift, Firebase

Aug 2026 – Present

- Designed and built a live iPhone alarm that rings as a call and reads a personalized morning briefing in one of ten character voices.
- Integrated AlarmKit and Live Activities in Swift, choosing AlarmKit over CallKit/VoIP push so alarms fire offline.
- Built the briefing backend on Firebase Cloud Functions: Gemini writes each script, ElevenLabs/Cartesia text-to-speech voices it, and App Check blocks unauthorized API use.

SKILLS

Design: user flows, information architecture, prototyping, interaction design, visual design, design systems, mobile design, accessibility (WCAG), user research, usability testing, Figma

Engineering: React Native, Expo, React, Next.js, TypeScript, Swift, Firebase (Auth, Firestore, Cloud Functions), Tailwind CSS, Node.js, Git

AI & Product: AI-assisted development (Claude Code), LLM APIs (Gemini), text-to-speech, PostHog, RevenueCat, A/B testing

EDUCATION

Bachelor of Science in Information Technology | Jose Rizal University, Philippines

2023
