PROFESSIONAL SUMMARY

Product Designer with 3+ years of experience designing B2B SaaS and consumer mobile products from research through release. At Velaro, owned core surfaces of a customer engagement platform and its Tailwind-based design system. Independently designed and launched GroceryBudget, a grocery budgeting app with 30,000+ users, and Fifi, an iOS alarm app. Proficient in Figma, design systems, and turning complex workflows into clear, scalable interfaces.

WORK EXPERIENCE

Product Designer | Velaro, USA (Remote)

Nov 2023 – May 2026

- Owned design-to-ship for core platform surfaces (admin, inbox, chat widget), taking each from Figma spec to production in close partnership with engineering.
- Designed IVR and sentiment analysis features end to end, from user flows and interaction design to engineering handoff specs.
- Built and maintained a Tailwind-based design system adopted across the platform, standardizing components and reducing design-to-dev handoff friction.
- Designed UX for workflow automation, the chat window builder, and the AI chatbot builder, delivering high-fidelity Figma specs adopted directly by engineering.

Product Designer | GrowthBox, Australia (Remote)

Jun 2023 – Nov 2023

- Designed core workflows for a SaaS analytics platform serving clinic managers, improving data accessibility and decision-making.
- Conducted user research to identify pain points and translated findings into actionable design improvements.
- Produced component specs and interaction flows in Figma that served as the source of truth for engineering handoff.

PROJECTS

GroceryBudget | iOS & Android

Apr 2025 – Present

- Solo-designed and launched a consumer grocery budgeting app on the App Store and Google Play, owning research, information architecture, wireframes, high-fidelity UI, and the Figma design system, then built it in React Native through AI-assisted development.
- Reached 30,000+ users and grew monthly revenue 20x in six months with zero paid acquisition.
- Redesigned the paywall and ran pricing experiments (trial vs. no-trial A/B test, US price test) in RevenueCat and PostHog; refocusing acquisition on the highest-converting market raised conversion to paid 9x.
- Owned App Store Optimization end to end (keywords, listing copy, screenshots), reaching #1 in US App Store search for “grocery budget.”

Fifi | iOS

Aug 2026 – Present

- Designed and launched an iPhone alarm that rings as a phone call and reads a personalized morning briefing in one of ten character voices, owning product strategy, interaction design, and character art direction.

SKILLS

Design: user research, usability testing, user flows, information architecture, wireframing, prototyping, interaction design, visual design, design systems, responsive and mobile design, accessibility (WCAG)

Tools: Figma, Tailwind CSS, React Native, PostHog, RevenueCat, App Store Connect, AI-assisted development

EDUCATION

Bachelor of Science in Information Technology | Jose Rizal University, Philippines

2023
